OHSAS 18001:2007 Certificate No. N669649

ISO 9001:2008 Certificate No. 630118

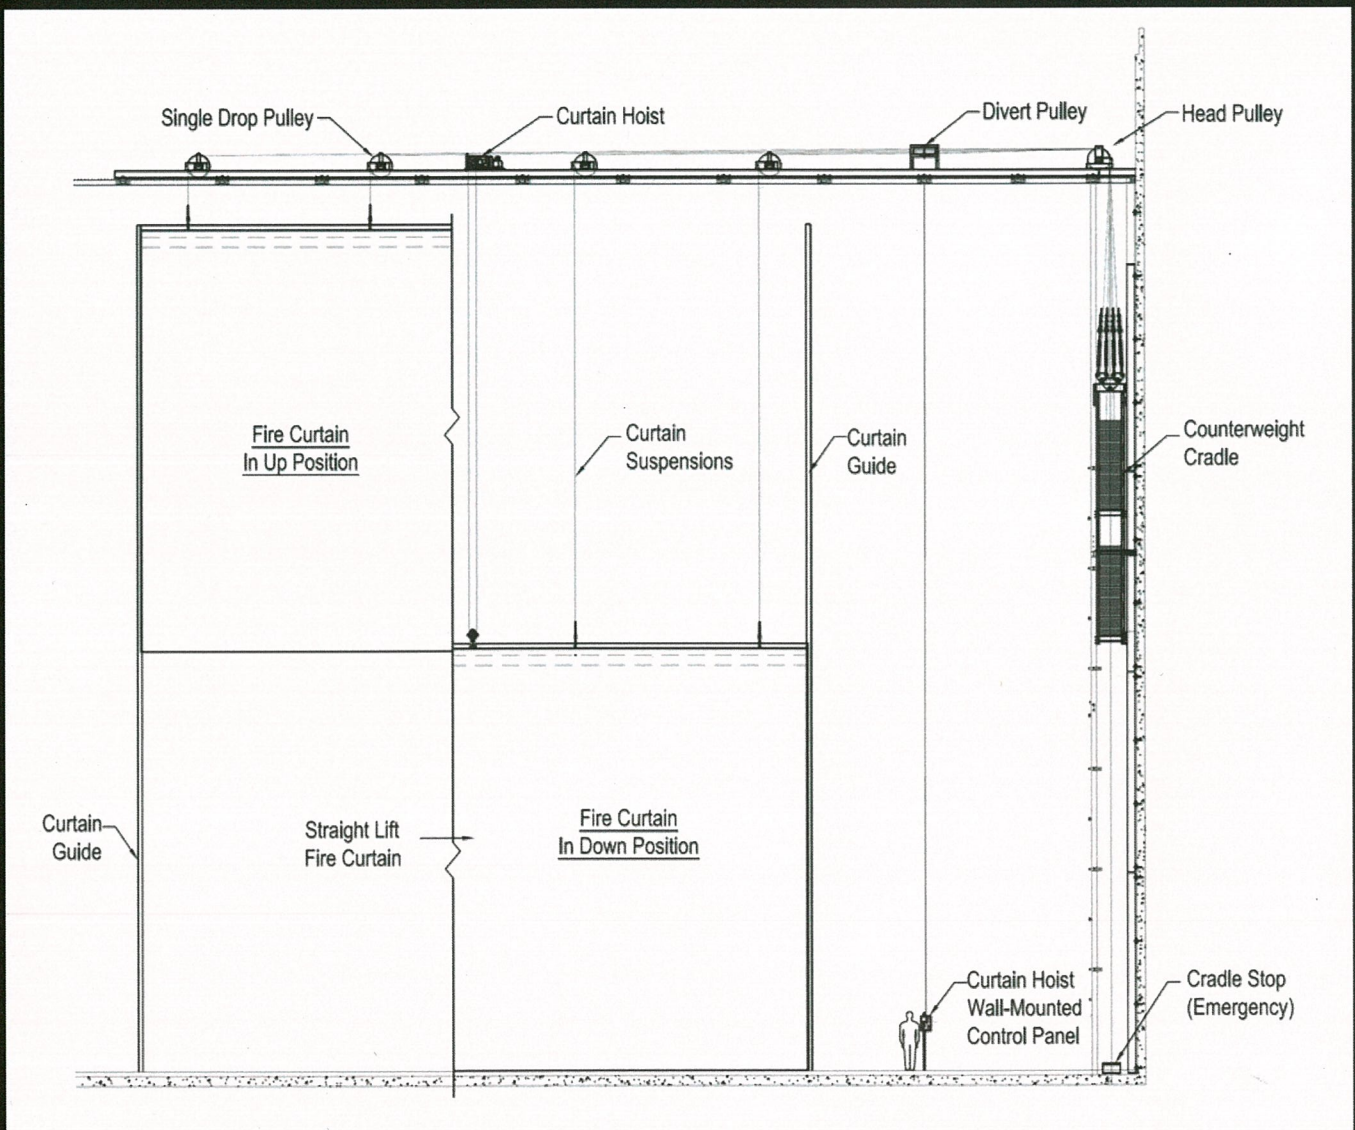

FIRE SAFETY CURTAINS

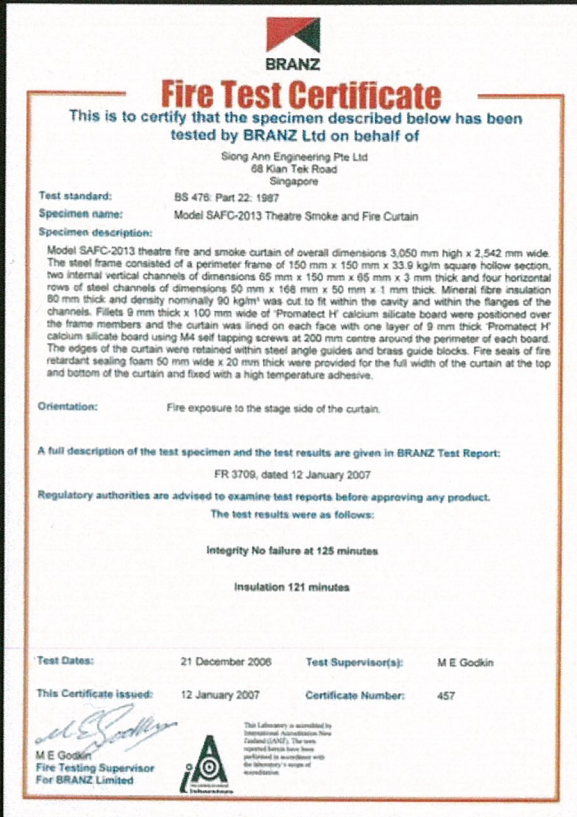

A manual or motorised operated fire curtain placed in-line with the proscenium to separate the stage and auditorium to be lowered or raised in an event of a fire or when required.

Straight Lift Fire Safety Curtains

The most straightforward design, the Straight Lift Fire Safety Curtain system is used when the available space is more than twice the proscenium height. It uses a counterweight set to balance the weight of the curtain. Motorisation is possible.

Fire Test Certificate

Counterweight Cradle

Main Control Panel/ Manual Release

Traction Drive Winch (Curtain Hoist)

Heavy Duty Divert Pulley
